

Private Equity Software and Services

The Burgiss Group, LLC, headquartered in Hoboken, New Jersey (USA), is a privately held company catering to limited partners, advisors and fund of funds in the private equity market. With over 200 clients across 14 countries, Burgiss provides solutions to manage investments through every stage of the private equity investment life cycle.

Burgiss solutions are designed to follow the entire private equity life cycle from initial deal pipeline and due diligence, through deal and document management, performance measurement, and portfolio holdings tracking.

At the Burgiss Group, we are very focused on helping our clients make good long-term choices in the face of rapidly changing technology. Please visit www.burgiss.com for additional information.

Private i FrontOffice

Deal Pipeline and Due Diligence

Private i FrontOffice is a hosted, browser-based application to manage offerings and due diligence in collaborative, virtual deal rooms. Built on an enterprise-class document management platform, Private i FrontOffice marries the power of document management to due diligence and deal management. Its secure, team-based approach allows both internal and external partners to collaborate on a deal-by-deal basis. Private i FrontOffice features:

- 100% web-based application, no installation, accessible anytime, anywhere
- Permission based deal and document security
- Tracking and reporting of portfolio allotments, deal focus, pipelines, and custom information
- Powerful filters, views, and quick reports
- Centralized communications through deal specific discussion forums
- Secure document storage and sharing
- Extensive contact management capabilities
- Outlook Synchronization and key date calendaring
- Full text key word search of over 200 file types in seconds

Private i

Investment Management and Performance Analytics

Private i is a powerful, multi-faceted second-generation database application for private equity investors. Private i allows you to capture transactions, measure performance, and report on private equity investments. Add-on modules allow you to track Direct Investing, Fund of Funds Administration, Benchmarking and Post Distribution Stock Management. Private i's advanced network architecture allows remote broadband access without the use of a VPN, Citrix, or other application layers. Other highlights include granular security including groups and roles, a more consistent user interface, and full integration with our custom report writer.

Private Informant

Portfolio Holdings Data Service

Private Informant is a web-based portfolio holdings data service for limited partners. Subscribers to Private Informant log in and view or report on partnership holdings, cost, market and proceeds activity, and company characteristics. This on-line service has dozens of reports and powerful on-screen analytics, enabling investors to consolidate and view multi-dimensional data for their underlying portfolios by sector, geography, and stage. Additional features include full multi-currency support, exposure of cross-holdings, comparing company multiples, reporting on quoted holdings pricing and total value, and custom reporting through Private i Analyst.

Private Archivist Enterprise

Document Management

Private Archivist Enterprise is a web-based enterprise class document management system that includes document-level security, check-in and check out, versioning, routing and notifications, content rules, full-text search for 200 file formats, discussion threads, and more.
