Streamline the student enrollment process with EZ School Registration. Apply the valued principles of simplicity, security and cost reduction to your district. { Work Smarter }

WHAT ONCE TOOK HOURS PER STUDENT NOW TAKES MINUTES

The Problems With Student Registration

Costly, Risk-Laden, Wasteful - Those Days Are Over.

K-12 Student Registration is a slow, document intensive process. Hours are spent filling out forms, copying documents and keying in data, by both your staff and a student's guardian.

In fact, until the day of graduation, the average student compiles 200 pages of documents in their file. Each piece was touched at least once by clerks or administrators.

Is this the best use of a district's time and money?

Working Smarter with SRC Solutions, Inc.

EZ School Registration digitizes the enrollment process, providing an immediate time savings.

A process that once took up to 2 hours per student is reduced to minutes.

A Growing Problem

Student enrollment is projected to increase over the next decade.

Consider the facts:

- Registration is projected to increase by 4% annually through 2014.
- The cost per student is projected to increase 8% during the same time period.

That means costs can only go in one direction: **Up.**

And what about the hidden risks associated with this outdated process? From government compliance to HIPPA exposure, the current process leaves you exposed to risk. Is this acceptable?

EZSR alleviates risk exposure, saves countless hours and reduces expenses. There is no comparable offering in the marketplace. If your plan for your district includes risk and cost reduction as well as a commitment to doing things better than before, you'll have to use EZSR.

Key Benefits

Long-Term Savings

- Average savings of \$3.5 million over 4 years

Risk Abatement

- Litigation associated with FERPA & HIPPA exposure
- Data loss and disaster recovery
- Loss of federal funding associated with inaccurate records keeping
- Guaranteed authenticity
- Open ended and secure

Waste Reduction

- Time lost due to redundant or inefficient processes
- Materials for a paper intensive process
- Money for storage systems

Are your student records at risk?

What took years to compile can be wiped out in minutes by many kinds of disasters, from floods to fires.

Is your data secure? What would it cost in time and expenses to replace your records?

In the wake of Hurricane Katrina, parents and administrators had to register more than 13,000 students – at a rate of 150+ students per day. A small portion of those students were new. How much time could have been saved if the records of the returning students had been retained?

In 2002, fire destroyed the administration building in Upper Merion Area School District. To save the documents that survived, the district had to review each piece and prepare it for scanning into a new content management system (at a rate of 10,000 pages per day). The cost of the lost content is incalculable.

You can mitigate the risk and the costs.

EZSR digitizes a student's records and stores them in a content management system. All grades, student data and so much more are stored off site and regularly backed up. The data simply cannot be lost or damaged.

Registration is Filled With Waste and Risk.

The current registration process is antiquated, costly and filled with risk. You've probably thought about it from time to time.

There is more waste and risk than you've imagined. Consider:

Waste

- Lost staff time associated with manually transcribing student data to multiple systems, filling out forms, copying documents and keying in data
- The cost of materials for a paper intensive process
- Lost space and funds associated with cumbersome storage systems

Risk

Have you considered the considerable risk associated with today's way of doing things? Your district needs to comply with government regulations to receive funding. EZSR can help you decrease some exposure you may not have even thought about.

- Litigation associated with FERPA and HIPPA exposure
- Data loss and disaster recovery costs
- Loss of funding due to inaccurate records keeping

If you've thought, even fleetingly, that there has to be a more efficient and cost effective way to handle student enrollment, you were right.

EZSR's Value is More Than Financial

Yes. There is long-term and measurable Return on Investment. We'll show you the savings before we even get started.

Today, the average cost of student registration is **\$161** per student. EZSR cuts it to **\$41** per student (on average). That's a total savings of \$3.5 million over four years for a typical district with 30,000 students.

Not bad.

That includes the ability to reallocate staff time to value-added activities. And the reduction in materials and storage costs.

EZSR brings so much more value to the table. All SIF requirements, HIPPA and FERPA standards are met. IEP documents are stored digitally and access is restricted programmatically. In case of a disaster, it's easy to recover data and restore records.

EZSR has built-in authenticity guarantees. It's open ended to work with any content management system. And it's secure. Bringing EZSR into your school will not expose you or your students to pirating.

Our fully configurable functionality will make it easy for you to expand the scope of EZSR.

Key Features

Easy to Use

Parent/Guardian enters student data remotely or at a user-friendly kiosk

Parents are guided from one form to another

Student documents are scanned and stored within the content management system

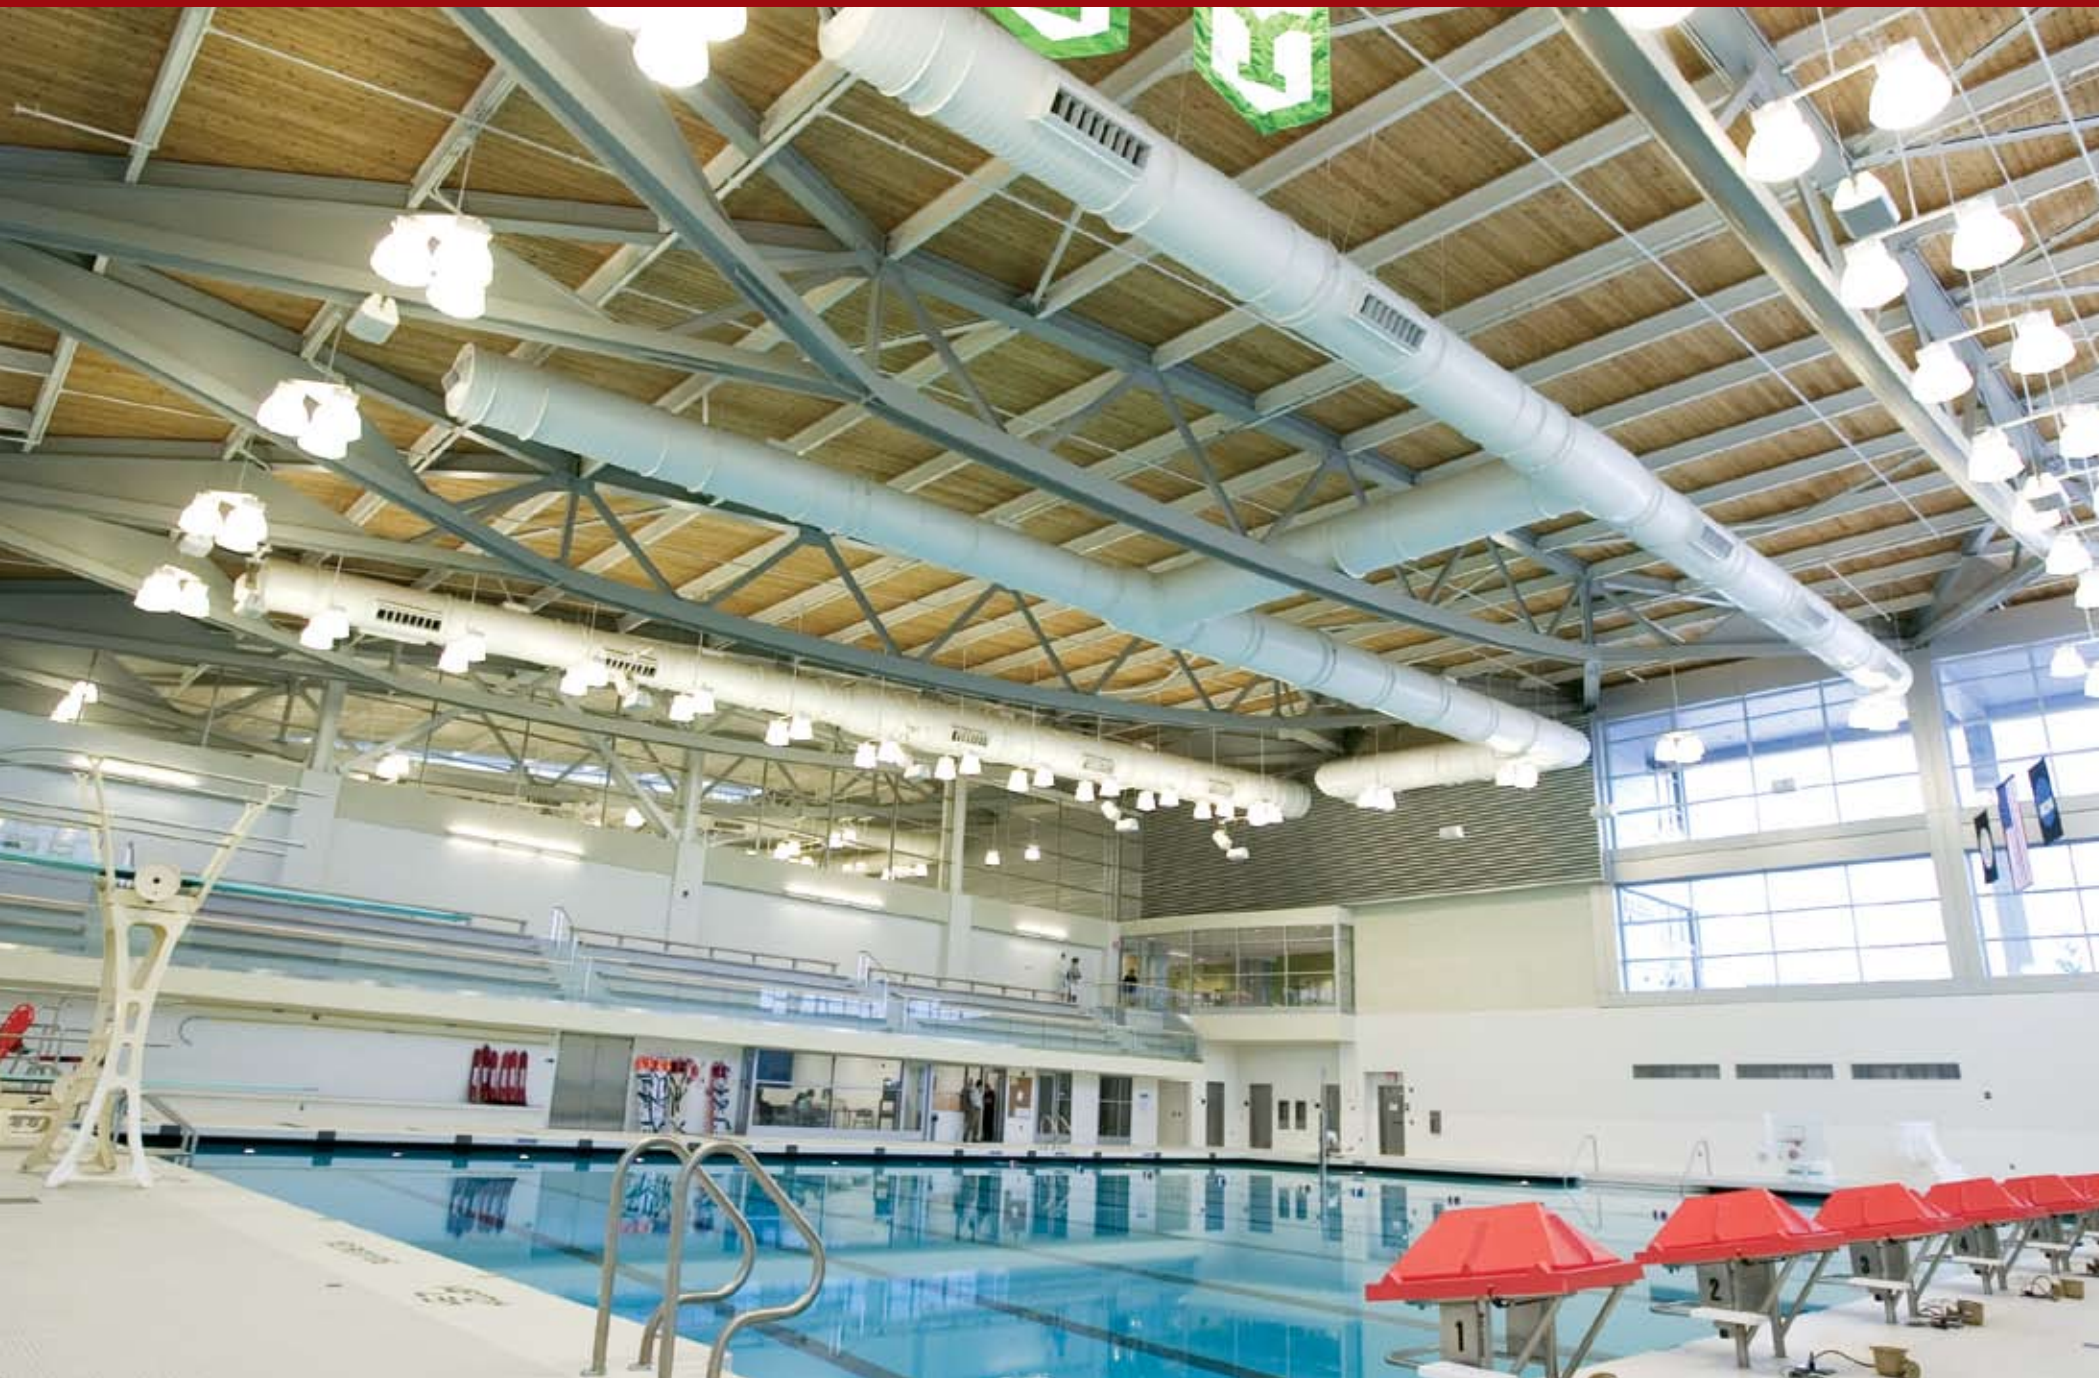

Signatures are captured on the signature capture pad

Intelligent

- Repetitive information is automatically replicated
- Accommodates multiple languages
- Student's information is automatically routed and stored within content management system

Build a legacy
of efficiency and simplicity.

Use the savings to foster growth and inspire your students.

Did We Mention That it's Easy to Use?

In fact, it's so easy to use, that the process actually begins with the student's parent or guardian. That's one of the ways in which we get your staff out of the process and onto another project.

Depending on what your district chooses, parents* can begin the process via the Internet from home or at a kiosk at your selected location. EZSR uses an easy-to-use, highly intuitive Wizard to walk parents through the initial portion of the enrollment process. It even allows for language selection to accommodate the non-English speaking portion of your student body.

Parents enter all key data for as many students as are necessary. Repetitive data is automatically carried over from one screen to another to reduce time and potential for error. Upon completion, the EZSR Wizard instructs the parents as to what documentation is needed and the student's data is sent to the school.

*and guardians

Only after a significant portion of data is entered by the parent is your staff engaged. Imagine the time savings.

Even when the process moves to the front office, it remains digital. Parents sign a digital signature capture pad. Students are photographed with a digital camera. Personal documents such as birth certificate, social security card and immunization records are scanned and stored in the student's folder. All initial documents and e-forms can easily be routed to appropriate users.

**There are no lost documents or duplicate copies.
The student's information is now part of your
school's content management system.**

Yes. It's That Simple.
